Job Title: QA Project Manager

Job Description:

Sculpin is looking for enthusiastic applicants for a QA Project Manager position. The position entails managing a team of testers and lead testers, and being a liaison between the test team and Sculpin's various clients.

Sculpin, a division of Other Ocean Group, is a world class indie developer and service provider that works on a large variety of project and platforms. Due to a recent influx of work, and the projected continuation of that work, an additional QA Project Manager is needed.

Key Responsibilities:

- Assigning appropriate tester resources to active projects
- Developing test plans, cases, and reports
- Quoting and estimating resources for new/incoming projects and clients
- Communicate daily with clients, and disperse appropriate information to testers
- Identify coaching opportunities for team members
- Keep up to date on technical trends and console certification requirements, and ensure team members maintain a reasonable awareness of those areas
- Use of time tracking software, bug tracking software, such as Jira, etc., Microsoft Office suite, Google Docs, etc.

Key Skills:

- Good team leadership and judgment
- Handling sensitive company/personal information
- Approachable
- Creative problem solver
- Good knowledge of Game industry
- Well rounded technical knowledge
- Able to multitask and delegate
- Able to function in an occasionally stressful environment
- Able to work within a deadline

Assets:

- Knowledge of various console compliance requirements
- Customer Service experience
- Human Resource experience
