

**Country:** Canada

**Province:** Prince Edward Island

**Job Title:** Video Game Programmer

**Job Description:**

Under the umbrella of Other Ocean Group, Sculpin's new development division is looking for enthusiastic individuals to take on the role of Programmer. The ideal candidate should have some game programming experience and be able and willing to work on any area of game programming needed.

**Qualifications:**

- 2+ years experience as a Programmer in the game industry and or related field (inclusive of a Coop term or internship)
- Bachelor's degree in Computer Science, or ability to demonstrate coding knowledge/ability
- Experience in either C/C++ or C#
- Must be strongly self motivated and an independent worker
- Excellent problem solving skills, with a proven ability to solve hard problems
- Excellent oral and written communication skills
- Positive attitude with a desire to work within a team environment towards a common goal

**Assets:**

- Experience in the gaming industry
- Experience with Unity
- Console programming experience
- Experience with Virtual or Augmented Reality
- Experience with Network programming
- Experience with version control systems such as Git, Perforce or SVN

Applicants with games industry experience preferred. We are looking for self-motivated workers who are passionate about gaming. We want all of our programmers to participate in game design and help bring out the *fun* in games.
